Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 2 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In regard to claim 2, it is unclear from the term “from outside” which component is being Referred to. Is it from outside the pad sleeve, or outside the fastening section?

Claim 7, lines 2-3 it is unclear what is meant by the phrase “a perimeter same”.

Claim 2 refers to the pad as the “pad sleeve” and Claim 7 refers to the pad as the “pad ring”. “Pad ring” should probably be changed to “pad sleeve” for consistency.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 3-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Albrecht.

In regard to claim 1, Albrecht discloses an improved pipe connector, comprising;

a fastening member (threaded section of 2) having a fastening section 4 on one end coupling with a bracing sleeve 5 and an external thread section on the other end, the bracing sleeve 5 having one end forming a curved edge and a bore inside for housing a pipe 1; and

Art Unit: 3679

a guarding member 3 having an internal thread hole to couple with the external thread section and housing a sleeve cap 6 which has a harness hole inside to gradually move towards the bracing sleeve over the curved edge when the guarding member is screwed with the fastening member to compress the pipe to form a secured fastening.

In regard to claim 2, the fastening section 4 is coupled (via 3) with a pad sleeve 7 from outside (sleeve 7 pads between 3 and 5).

In regard to claim 3, wherein the harness hole of the sleeve cap 6 is a sloped hole with a smaller inner diameter and a larger outer diameter.

In regard to claim 4, wherein the pipe 1 is selected from the group consisting of a two-way pipe or an elbow pipe.

In regard to claim 5, wherein the fastening member consists of a left side member 2 and a right side member 4 that are coupled.

In regard to claim 6, wherein the right side member has one side 2 forming a housing zone.

In regard to claim 7, wherein the left side member has a flange (outer most on flange 4) on one side that has a perimeter same as the housing zone (outer surface of 2) and is coupled with a pad ring 7 (sleeve 7 pads between 3 and 5).

Conclusion

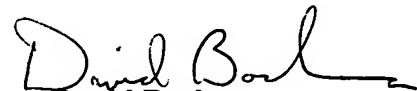

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wood et al., Newman, Yokomatsu et al., Japanese Patents 2,163,592, 2,163,591, and 1,316,594 all disclose similar couplings common in the art.
